

سرفصل های دوره MCITP :

Module 1: Install, Migrate, or Upgrade to Windows 7
Module 2: Configuring System Images
Module 3: Deploying System Images
Module 4: Managing Devices and Disks
Module 5: Managing Applications
Module 6: Network Settings
Module 7: Windows Firewall and Remote Management
Module 8: BranchCache and Resource Sharing
Module 9: Authentication and Account Control
Module 10: DirectAccess and VPN Connections
Module 11: BitLocker and Mobility Options
Module 12: Windows Update and Windows Internet Explorer
Module 13: Monitoring and Performance
Module 14: Recovery and Backup

مشاهده سرفصل دوره Active Directory

Active Directory (70-640) Syllabus:

Module 1: Installation
Module 2: Administration
Module 3: Users
Module 4: Groups
Module 5: Computers
Module 6: Group Policy Infrastructure
Module 7: Group Policy Settings
Module 8: Authentication
Module 9: Integration Domain Name System with ADDS
Module 10: Domain Controllers
Module 11: Sites and Replication
Module 12: Domains and Forests
Module 13: Directory Business Continuity
Module 14: Active Directory Lightweight Directory Services
Module 15: Active Directory Certificate Services and Public Key Infrastructure
Module 16: Active Directory Right Management Services
Module 17: Active Directory Federation Services

مشاهده سرفصل دوره Network Infrastructure

Network Infrastructure (70-642) Syllabus:

Module 1: Understanding and Configuring IP
Module 2: Configuring Name Resolution
Module 3: Configuring a DNS Zone Infrastructure
Module 4: Creating a DHCP Infrastructure
Module 5: Configuring IP Routing
Module 6: Protecting Network Traffic with IPSec
Module 7: Connecting to Networks
Module 8: Configuring Windows Firewall and Network Access Protection
Module 9: Managing Software Updates

Module 10: Monitoring Computers
Module 11: Managing Files
Module 12: Managing Printers

مشاهده سرفصل دوره Application Infrastructure

Application Infrastructure (70-643) Syllabus:

Module 1: Implementing and Configuring a Windows Deployment Infrastructure
Module 2: Configuring Server Storage and Clusters
Module 3: Installing and Configuring Terminal Services
Module 4: Configuring and Managing a Terminal Services Infrastructure
Module 5: Installing and Configuring Web Applications
Module 6: Managing Web Server Security
Module 7: Configuring FTP and SMTP Services
Module 8: Configuring Windows Media Services
Module 9: Configuring Windows SharePoint Services

مشاهده سرفصل دوره Enterprise Administrator

Enterprise Administrator (70-647) Syllabus:

Module 1: Planning Name Resolution and Internet Protocol Addressing
Module 2: Designing Active Directory Domain Services
Module 3: Planning Migrations , Trusts , and Interoperability
Module 4: Designing a Network Access Strategy
Module 5: Design a Branch Office Deployment
Module 6: Planning Terminal Services and Application Deployment
Module 7: Server and Application Virtualization
Module 8: Planning and Designing a Public Key Infrastructure
Module 9: Designing Solution for Data Sharing , Data Security , and Business Continuity
Module 10: Designing Software Update Infrastructure and Managing Compliance
